SUMMARY

Full Stack Developer specializing in the MERN stack with hands-on experience in building real-time, scalable, and secure web applications. Developed multiple end-to-end projects including chat applications, feedback dashboards, and secure link generation systems using REST APIs and authentication mechanisms.

Proficient in MongoDB, Express.js, React.js, and Node.js, with additional experience in SQL and Python for data-driven development and analysis. Strong problem-solving skills, structured thinking, and a background of 8 years in the teaching field, which enhanced communication, analytical thinking, and mentoring abilities.

TECHNICAL SKILLS

MERN Stack: MongoDB, Express.js, React.js, Node.js

Frontend: HTML5, CSS3, JavaScript (ES6+)

Backend & APIs: RESTful APIs, Authentication & Authorization (JWT), Real-time Applications (Socket.io)

Tools & Version Control: Git, GitHub, Postman

Databases: MongoDB, SQL

Data & Analytics: Python (Pandas, NumPy), Excel, Data Analysis

CERTIFICATION

Software Engineer— HackerRank | 2026

Demonstrated strong problem-solving skills, data structures, and algorithms through coding assessments

React.js Certification — Simplilearn | 2023

Built dynamic user interfaces using React concepts like components, state, props, and event handling

Google Data Analytics Professional Certificate — Coursera | 2025

Gained experience in SQL, Python, data cleaning, EDA, and data visualization

PROJECTS & PRACTICAL EXPERIENCE

Real-Time Chat Application (MERN + Socket.io)

- Built a real-time chat application using the MERN stack and Socket.io enabling instant user communication
- Developed 10+ REST APIs for authentication, messaging, and user management
- Implemented bidirectional real-time communication with low-latency event handling
- Designed secure authentication and authorization system using Node.js and Express.js
- Optimized MongoDB queries for efficient message storage and faster retrieval
- Created a responsive React.js UI ensuring smooth experience across devices
- Implemented features like typing indicators, user presence, and real-time notifications

Client Feedback Dashboard (Full Stack Application)

- Developed a full-stack feedback management system to collect, analyze, and visualize user data
- Designed REST APIs for seamless frontend-backend communication
- Implemented dynamic data visualization to identify trends and actionable insights
- Structured and managed large datasets for improved decision-making
- Built a responsive and user-friendly React.js interface

Neuro SaaS (AI-Powered Analytics Dashboard)

- Built a full-stack AI-powered SaaS dashboard for data analytics and intelligent insights
 - Developed a scalable MERN stack architecture with modular and reusable components
 - Designed REST APIs for handling analytics data, user actions, and dashboard metrics
 - Implemented real-time and dynamic data visualization for actionable business insights
 - Integrated AI-driven features to enhance data interpretation and decision-making
 - Created a responsive and modern UI using React.js for seamless user experience across devices
 - Focused on performance optimization, clean architecture, and scalable backend design
-

ADDITIONAL EXPERIENCE

- Educator / Instructor
 - 8 years of experience teaching and mentoring students
 - Developed strong communication and problem-solving skills
 - Simplified complex concepts, improving understanding and engagement
 - Built structured and logical thinking approaches
-

EDUCATION

- **Master of Business Administration (Finance & Human Resources) | 2023**
Gandhi Institute of Advanced Computer & Research
- **Bachelor of Science (Chemistry) | 2019**
Model Degree College, Rayagada
